

## PMK - Mechanical Cushion Seal Dock Shelter

The PMK Mechanical Cushion Seal is designed for loading and unloading truck fleets with almost identical dimensions in width and height. It guarantees perfect protection from draughts, rain and wind, preventing energy loss. The PMK is equipped with a horizontal cushion and two vertical cushions consisting of foam material completely covered by a PVC-coated high-resistance Trevira fabric. The dimensions of the dock seals are determined depending on the type of loading bay and vehicle to be loaded or unloaded. The PMK dock shelter is pre-assembled and comes in just three parts making installation to the façade quick and easy.
